Here are the dimensions (in metric). The Gen350 refers to the intermediate size generator that Watergen manufactures <http://water-gen.com/>

Gen 350 dimensions (Hx L xW):

Jay,

Our electrician is out this week, so I don't have an answer for you, yet, on the cable length or connector type. However, we will have to find a place to locate the WaterGen for testing at T&E. This will affect the cable length, obviously. Do you have an approximate size of the unit so we can determine where it will fit?

Don

Don Schupp, P.E.

**Subject:** RE: WaterGen T&E Questions

A question from watergen.

The power we need is: [Ex. 4 - CBI]

[Ex. 4 - CBI]

We like to know the connector type and how long the cabal should be.

Can you provide a response?

**Ex. 4 - CBI**

Jay,

I spoke with our electrician (Gary Lubbers). He said that we have sufficient power at the T&E Facility to power the WaterGen unit. With Ex. 4 - CBI we will need approximately Ex. 4 - CBI and we can go as high as Ex. 4 - CBI. We will need to see if they need either Ex. 4 - CBI and the specific connector that they have, but it should be doable.

Also, as we discussed, the T&E highbay is heated in the winter to approximately Ex. 4 - CBI but I believe that EPA Facilities controls that temperature. It is not ever cooled or humidity controlled. We have two large environmental chambers in the highbay, but they have not been actively used (temperature or humidity controlled) for about 10 years and need significant work to get in operating condition.

Please let us know if you have any questions, and we look forward to seeing the unit at T&E.

Don

Don Schupp, P.E.

**Subject:** WaterGen T&E Questions

Hi Jay,

For electrical and other HVAC issues I would refer you to Radha. Gary Lubbers on his staff should be able to handle such questions. In regards to humidity control, there is the Environmental Chamber (phytoremediation projects) that might be able to conduct experiments with different humidity levels, although I'm not sure the medium size WaterGen unit would fit through the door.
